- ✓ Helped us learn about data structures, file storage, terminal programming, and communication between programs.
- ✓ Runs quickly and works well even on low-specification computers.
- ✓ Can be improved in the future by adding a database, user login, sales reports, and a graphical interface (GUI).

- ✓ Successfully built a POS Accessories System using C++ and ncurses.
- ✓ Can manage products and process customer purchases.
- ✓ Uses a stack to keep track of the shopping cart and receipts.
- ✓ Saves product information in CSV files, so the data is not lost after closing the program.
- ✓ Supports QR code payment using a Flask server.
